***It's the summer of 1989.*** Batman owns the box office, Milli Vanilli rules the airwaves, stone-washed Cavariccis are all the rage...and Sebastian Riggs has bigger problems than being made to do the school bullies' homework or winning the attention of the coolest girl in his class. The one thing in the world he desperately needs is the one thing he can't seem to get: a vintage stunt radio-controlled airplane—the Dreamin'.

Seb's mission is clear: make enough money to buy the Dreamin' and become a world-renowned R/C pilot, thereby earning his father's respect... or fail and remain a tormented loser for life. The stakes couldn't be any higher and summer job opportunities are in short supply. Finding obstacles at every turn and help in some surprising places, Seb embarks on a mission to fulfill his dreams of R/C glory and prove to the world he's a force to be reckoned with. But in a small town built on well-kept secrets, could his dream bring everyone's dark side to light?
